

Biruk Chali Tessema

Software Engineer | Full-Stack, APIs & System Design

+251-940-675-703 | birukchali86@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

- Software Engineer with 3+ years of experience shipping scalable full-stack applications, designing REST/GraphQL APIs, and refactoring complex codebases across JavaScript, TypeScript, Python, and React Native.
- Skilled in asynchronous collaboration, conducting rigorous code reviews, writing reproducible technical documentation, and optimizing CI/CD deployment pipelines.
- Hands-on expertise integrating AI models, prompt evaluations, and third-party services into production environments.

TECHNICAL SKILLS

- Languages:** Python, JavaScript (ES6+), TypeScript, C++, SQL, HTML5/CSS3
- Full-Stack & Mobile:** React.js, Next.js, React Native, Node.js, Express, Django, FastAPI, Redux, Tailwind CSS
- Databases & Cloud:** PostgreSQL, MongoDB, Firebase, Supabase, SQLite, Docker, DigitalOcean, Vercel
- Engineering Practices:** REST/GraphQL APIs, WebSockets, Git/GitHub Workflows, CI/CD (GitHub Actions), System Design, Code Review
- AI Tools & Frameworks:** OpenAI API Integration, Prompt Engineering, Model Evaluation, NLP Pipelines

PROFESSIONAL EXPERIENCE

Upwork

Remote

Senior Software Developer (Freelance / Contract)

Sep 2025 – Present

- Engineer end-to-end full-stack web platforms and mobile applications for global clients using React, Next.js, Node.js, and Python.
- Independently scope, implement, and deliver features across diverse codebases while maintaining strict asynchronous communication and documentation standards.
- Conduct thorough code reviews, write automated unit/integration tests, and optimize complex database queries to ensure platform stability.

MonaMary LLC

Remote

Senior Mobile Engineer (Contract)

Jan 2025 – Jun 2025

- Architected 3 cross-platform applications featuring offline-first data persistence, local SQLite caching, and clean modular code architecture.
- Debugged and refactored critical application pathways, reducing global crash rates by 35% through strict error handling and boundary implementations.
- Integrated automated payment and subscription pipelines generating \$5k+ in recurring monthly revenue.

Diamond Tech

Onsite

Full-Stack Developer (Full-Time)

Mar 2024 – Aug 2025

- Built and maintained a real-time web application and administrative analytics dashboard supporting 500+ concurrent active users.
- Designed secure JWT authentication mechanisms and optimized MongoDB and PostgreSQL queries, cutting API latency by 40%.
- Refactored legacy codebases to improve maintainability, performance, and scalability across the stack.

Kiburan Trading

Hybrid

Software Team Lead (Contract)

Jun 2024 – Sep 2025

- Led code reviews and mentored 3 junior engineers on software design patterns, modular architecture, and Git branching workflows.
- Configured automated GitHub Actions CI/CD pipelines, reducing manual deployment timelines by 60%.

KEY PROJECTS & ENGINEERING CONTRIBUTIONS

1. REV Fitness – AI-Driven Health Platform

React Native, Node.js, OpenAI API, Firebase

- Designed and deployed an AI-assisted health platform integrating the OpenAI API for personalized fitness recommendations.
- Built robust API endpoints, structured model evaluation logic, and integrated background data synchronization tools.

2. Enterprise POS & Inventory Dashboard

React, Node.js, PostgreSQL, Docker

- Developed a full-stack retail management web system featuring real-time inventory tracking, barcode processing, and transactional reporting.
- Containerized application services using Docker to ensure reproducible local and cloud deployment environments.

3. CosmicAI – NLP Analytics Service

Python, Supabase, Custom NLP

- Implemented and benchmarked custom NLP models achieving 85% intent classification accuracy for conversational AI workflows.

EDUCATION & OPEN SOURCE

Adama Science and Technology University

Adama, Ethiopia

B.Sc. in Software Engineering

Graduated: 2024 | **GPA:** 3.34 / 4.0

- **Open Source Maintainer:** Developed and maintain 3 open-source React Native libraries with 500+ cumulative downloads.
- **Tech Leadership:** Founder of WebSmart Inc. (mentored 50+ students); Lead Organizer for 2024 Adama Tech Challenge (150+ participants).
